EDUCATION

University of California, Riverside

2022

Bachelor of Science in Computer Science

Riverside, CA

- **Relevant Coursework:** Software Engineering, Artificial Intelligence, Virtual/Augmented Reality, Computer Graphics, Entrepreneurship in Computing, Data Structures and Algorithms, Database Management Systems

EXPERIENCE

Software Developer Contract

Jul. 2025 – Oct. 2025

Nexxonic, Inc.

Remote, CA

- Architected and led the migration of a legacy webpage to a modern, type-safe application using **TypeScript**, **React**, and **Next.js**, resulting in a 30% improvement in page load times and enhanced code maintainability
- Engineered a secure RESTful API within the Next.js application to bridge the React/Tailwind CSS frontend with PostgreSQL database, enabling real-time product data indexing and retrieval

Coding Instructor

Nov. 2023 – Aug. 2025

Code Ninjas

Irvine, CA

- Mentored aspiring developers in core software engineering principles, designing hands-on workshops that covered algorithm design, version control, and systems logic using technologies like C#, Unity, and Minecraft Modding.
- Key contributor to scaling a new center to 150+ students by developing reusable code libraries and technical documentation that streamlined the delivery of instruction and enabled the rapid launch of new courses.

Software Engineer Intern

Apr. 2022 – Sept. 2022

Appriss Retail

Irvine, CA

- Worked in an **ASP.NET** environment using tools and languages such as **C#**, **TypeScript**, **Microsoft SQL Server**, **Microsoft Azure**, **Visual Studio**, **Blazor**, **Bootstrap**
- Developed features in a **model-view-controller** (MVC) architecture, resulting in a better understanding of software design
- Integrated a stored procedure, resulting in more coverage for client queries
- Refactored a client-facing Google Maps feature using the Bootstrap framework to create a more intuitive and visually appealing user experience
- Identified and resolved a critical security vulnerability, securing sensitive API keys from unauthorized access
- Collaborated within an Agile team of software and QA engineers to resolve JIRA tickets, contributing to on-time sprint deployments

PROJECTS

Full-stack web application: (Steamdle: Guess the Steam Game)

[Link to play](#)

- Utilized **React**, **TypeScript**, **Python**, and **Flask** to create a game where the player has to guess the correct Steam game
- Created a **Flask** back-end with RESTful endpoints to handle API requests and perform server-side computations
- Utilized **React** to create a Row and Card components that display information about the guess such as higher or lower and correct or incorrect
- Cleaned and processed web-scraped data with **NumPy** and **Pandas** to create a curated pool of potential answers based on criteria like review count, software type, and genre
- Customized the front-end using **Tailwind** to create a visually appealing experience
- Leveraged browser local storage to cache user guesses, persisting progress across sessions

TECHNICAL SKILLS

Languages : Python, C#, JavaScript/TypeScript, SQL, C++

Frameworks & Libraries: .NET, Flask, React.js, Tailwind, Next.js

Developer Tools: Git, VS Code
